

MTS is a consumer product quality assurance company strategically positioned in global locations. Our team consists of some of the most technical, innovative and energetic people in the industry. The MTS teams dedicate themselves to the core philosophy of being the most responsive, knowledgeable, and client-focused in the industry. We work with our clients to develop customised solutions and testing packages for their specific needs to increase speed to market efficiency, reduce cost by eliminating unnecessary testing, and position their products to meet and exceed customer expectations.

MTS joined Eurofins in November 2021.

Eurofins is the global leader in food, environment, and pharmaceutical product testing. Eurofins S&L- T&H, comprised of a global network with a strong footprint

in Europe, is an innovative and fast-growing services provider specialising in sustainability, quality and safety solutions for the textile, leather, footwear, toy and hardgoods industries.

The synergy between MTS and Eurofins allows for an expanded laboratory network with enhanced services. We have stronger testing capabilities, additional product category coverage, and more comprehensive services with strong technical expertise.
