With growing concerns about the quality and safety of consumer goods, MTS offers a wide range of hard goods testing, certification and verification services tailored to your specific needs. Our hardline division helps clients ensure their products meet all regulatory and industry requirements while minimizing costs and providing ongoing quality assurance support. MTS takes a proactive approach to meeting increasingly complex demand and consumer expectations by offering the following benefits:

✓ Ensuring compliance with international regulations and customer requirements.
✓ Maintaining brand protection by minimizing the risk of product recalls and customer complaints
✓ Receive test results faster so you can take action sooner
✓ Reduce testing costs by offering tailored test packages for your product's specific requirements to avoid unnecessary testing.
✓ Get expert advice in case of non-conformities and stay up to date with any regulatory changes.

MODERN TESTING SERVICES

ABOUT US

Modern Testing Services (MTS) was founded in 2006 as an independent consumer quality assurance company specializing in product testing, inspection, and certification services. Today, MTS operates in more than 19 locations worldwide and employs more than 1,200 people, including some of the strongest technical and innovative minds in the industry. As an independent quality assurance company, MTS operates without the pressure of short-term financial results, allowing its teams to dedicate themselves to their core philosophy of being the most responsive, knowledgeable and client-focused in the industry. By utilizing our technical expertise and experience throughout the sourcing process, MTS delivers accurate and cost-effective solutions that help you ensure the quality and safety of your products, meet regulatory requirements and exceed your customers’ expectations.
